## DETAILED ACTION

- 1. The amendments made to the claims by the Applicant have been considered, but do not overcome the prior art previously presented.
- 2. The following claim 1 is drafted by the examiner and considered to distinguish patentably over the art of record in this application, is presented to applicant for consideration:

A system for detecting and annunciating when a loss of occupancy detection in transit systems, such as a train operating on rails and controlled by an automatic train control system, goes undetected with said system comprising:

a first car in a train with an automatic train operation system which detects a speed command of a proceeding block;

an end car in a train with an automatic train operation system which detects the speed command of a trailing block while its control function is disabled;

a speed command comparison device to compare the speed command of the trailing block with known speed commands; and

an automatic train control system communicating with said speed command comparison device and a controller device that controls the reception or transmission of speed commands and formatting of a Global Position System receiver's output data, speed commands and decoded data received from said speed command comparison device whose data output is supplied to an optical transceiver, radio frequency transceiver, train line transceiver, or traction power transceiver for the purpose of

Art Unit: 3661

September N

detecting and annunciating when a train whose presence should be detected and annunciated goes undetected and unannounced.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marie A. Weiskopf whose telephone number is (571) 272-6288. The examiner can normally be reached on Monday-Thursday between 7:00 AM and 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on (571) 272-6956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
